**Introduction:** The ADJ FX Beam is part of ADJ's continuing pursuit for creating high quality affordable fixtures. The FX Beam is a micro pin beam effect powered by a high output 3W white CREE LED. The beam is a narrow 3 degrees, and when used in multiples creates pure lighting excitement. The FX Beam has 2 operating modes: Sound Active and Strobe. The Strobe rate is able to be adjusted using the speed knob. The FX Beam is great for spotting mirror balls, party tables, or retail and trade show displays. The FX Beam is also suitable for theaters, studios, retail stores, and other similar locations.

**Installation:** The unit should be mounted using a mounting clamp (not provided), affixing it to the mounting bracket that is provided with the unit. Always ensure that the unit is firmly fixed to avoid vibration and slipping while operating. Always ensure that the structure to which you are attaching the unit is secure and is able to support a weight of 10 times the unit's weight. Also, always use a safety cable that can hold 12 times the weight of the unit when installing the fixture.

The equipment must be installed by a professional, and it must be installed in a place where it is out of the reach of people's grasp.
