

# JELLY JEWEL LED

The Jelly Jewel is part of the popular "Jelly Series" (glowing transparent housing) from American DJ. It offers two exciting effects in one: a glowing transparent housing, plus 46 red, blue, green and white (RGBW) LED beams of light that can be projected on walls, ceilings or dance floors. The Jelly Jewel is easy to use; just plug it in and watch the beams of light move to the beat of music by way of its own built-in programs, plus it's designed for longevity with no moving parts, a 50,000 hour life rating, low heat output and low power consumption. For maximum effect, use a fog or haze machine so that the beams of light can be seen.

#### Specifications:

- LED Moonflower with 46 sharp RGBW high output colored beams\_ (16 Red, 10 Green, 10 Blue & 10 White LEDs)
- 2-FX-IN-1: Glowing transparent housing + 46 sharp RGBW beams of light
- Sound active movement from built-in programs
